vCenter events (24h)

critical (1)

✕ 2026-10-17 14:12 **[vm-033]** Snapshot older than 90 days: performance impact likely

warning (2)

! 2026-10-17 15:18 **[esxi-04]** Host memory state changed to HARD

! 2026-10-17 14:42 **[datastore]** ds-prod-02 latency above the warning threshold (28 ms p95)

ok (1)

✓ 2026-10-17 12:00 **[Backup]** Job "Prod-Daily" completed: 47 VMs, 0 failures

info (3)

· 2026-10-17 13:55 **[DRS]** Migrated vm-008 from esxi-04 to esxi-05 (memory rebalance)

- 2026-10-17 12:38 [HA] Cluster HA monitoring nominal (11/11 hosts responding)
- 2026-10-17 02:00 [DRS] Recalculation complete

What to do

CRITICAL **Snapshots older than 90 days** — Storage 2

Description

Old snapshots slow the VM and grow without limit.

Recommendation

Consolidate or delete them after confirming with the owner.

Affected (2)

`vm-033` `vm-050`

WARNING **esxi-04 is short of memory** — Compute 1

Description

94% memory used, ballooning and swapping.

Recommendation

Let DRS move two more VMs, or add memory.

Affected (1)

`esxi-04`

WARNING **ds-prod-02 latency is above 25 ms** — Storage 1

Recommendation

Move busy VMs to vsan-prod.

Affected (1)

`ds-prod-02`
