Summary

In this view

The verdict answers the whole question in a sentence and counts findings by severity. The score ring and the maturity ladder come from YOUR rules (the lowest unmet control sets the level); DashHtml only draws them.

Summary 3

OVERALL

Elevated risk

Two warnings on authentication need action this month.

2 Warning · 1 Info · 2 OK

SECURITY POSTURE

Elevated risk

211 checks · 31 failed · 53 warnings

▲ +3 (+4.5%) *20 not assessed*

SECURITY MATURITY

Initial

Level 1 of 5 · The lowest unmet control sets the level.

1 **Initial** — 2 Managed — 3 Defined — 4 Measured — 5 Optimised

Ad hoc.

To reach level 2 (Managed)

- ○ Enable the Recycle Bin
- ○ Raise the tombstone lifetime to 180 days
- ✓ Disable NTLMv1 on every DC

Scope of this assessment

Forest	Domain controllers	Collected via	Pending reboot
corp.example	3	WinRM	None

NTLMv1	Time skew
Disabled on all DCs	up to 3 s

Findings › List

Domain controllers

DC	SITE	OPERATING SYSTEM	RAM (GB)	ROLES
dc01	HQ	Windows Server 2022	8	PDC GC
dc02	HQ	Windows Server 2022	8	GC
dc03	EU	Windows Server 2019	16	GC DNS

In this view

The default layout: one expandable row per finding with severity, description, recommendation, affected objects and links. Counters filter by severity; critical findings start open. "Show in table" jumps to the table below and filters it.

Findings (list)

Replication 1

CRITICAL Inbound replication on dc03 is stalled — Replication 1

Description

dc03 has not replicated from dc01 for 12 minutes (error 1722).

Recommendation

Check RPC between the sites, then run repadmin /syncall dc03 /AdeP.

Affected (1)

`dc03`

Troubleshoot error 1722

Authentication 1

WARNING LDAP signing is not required — Authentication 2

Description

Two DCs accept unsigned binds.

Recommendation

Require signing after checking the client inventory.

Affected (2)

`dc01` `dc02`

Recovery 1

INFO Recycle Bin is enabled — Recovery

Description

Enabled on the forest.

Findings › Split

In this view

Split layout: the list on the left, the selected finding on the right. A finding carries Facts (tiles), Evidence (one row per object with its own status), a Change marker, references and an optional Detail panel. Print shows every pane.

Protocols and hardening (split)

WARNING New **NTLM level** — Authentication

Description

LAN Manager authentication level. Below 5 the DC still accepts LM and NTLMv1.

Recommendation

Raise the level to 5 once no NTLMv1 clients remain.

Recommended	Domain controllers
5, NTLMv2 only	3 of 3 below

Evidence (3)

OBJECT	VALUE	STATUS
dc01	Level 4	Warning
dc02	Level 4	Warning
dc03	Level 4	Warning

WARNING Worse **LDAP signing** — Authentication

Recommendation

Require signing on every DC.

Evidence (3)

OBJECT	VALUE	STATUS
dc01	Negotiate	Warning
dc02	Negotiate	Warning
dc03	Require	OK

INFO Better **Recycle Bin** Recovery

Description

Enabled on the forest.

Enabled

Yes

OK **SMB signing** Authentication

Evidence (3)

OBJECT	VALUE	STATUS
dc01	Required	OK
dc02	Required	OK
dc03	Required	OK

OK Resolved **SMBv1** Recovery

Description

Disabled on every DC.

Findings › Nothing found

In this view

A check that found nothing says so, with a check mark and your sentence, instead of an empty block.

Delegation findings

✓

No unconstrained delegation found.

Details › Property tiles

In this view

Property tiles show facts about one thing: label, value, and an optional status colour on the edge. Use them instead of a two-column table.

dc01

Manufacturer	Model	BIOS
VMware, Inc.	VMware20,1	VMW201.00V.24504846

Total memory	CPU usage	C: free
8 GB	2%	73 GB (74%)

Details › Record list

In this view

One row per record with a status dot and up to four metrics. Open a row for tiles, bars, tables and checks. Filter box and expand-all included; print shows every row open.
