¡ **Alert**
¡ This banner has no path, so it is on every view. Dismiss it with the cross; the choice survives a reload.

OK **Notice**
OK Backups completed for all 247 machines.

! **Warning** Show them
! Three certificates expire within 30 days.

! **Critical**
! The payment gateway has been down for ten minutes.

¡ **Collapsed banner (click to open)**
¡ Longer explanations can sit inside a collapsed banner.

Header and banners

In this view

The header shows the title, subtitle and the info fields given to New-DhDashboard. Banners carry a severity, an optional action button (it jumps to a table and filters it) and can be dismissible or collapsible.

Certificates

CERTIFICATE	STATE	DAYS LEFT
vpn.contoso.com	EXPIRING	12
mail.contoso.com	EXPIRING	21
www.contoso.com	OK	211
api.contoso.com	EXPIRING	28

Text blocks

In this view

Add-DhHtmlBlock has five styles: info, ok, warn, danger and neutral. Text is encoded unless you pass -AllowHtml and trust the source. Add-DhCollapsible folds cards or free content.

ok

Everything is working as expected.

warn

Something needs attention soon.

danger

Act now.

neutral

A plain remark with no colour.

Teams at a glance 3

Platform	12 people
On call	Yes
Status	ok

Security	7 people
On call	Yes
Status	warn

Data	9 people
On call	Yes
Status	ok

Free content (folded by default)

Any explanation, runbook link or legend can sit here, out of the way until someone opens it.

Tabs

In this view

Tabs switch the content of one block. The menu navigates the page; tabs do not change the address.

One service, three views

Overview | Dependencies | Runbook

The service has run for 214 days without an unplanned outage. Last release: 2026-10-02.

Depends on the identity provider, the message bus and the primary database.

1. Check the health endpoint. 2. Check the queue depth. 3. Restart the worker pool.

Events

In this view

A chronological, severity-tagged log. -GroupBy Severity (or Source) groups it; the default is newest first. Events are plain text: nothing in them is interpreted as HTML.

Events, grouped by severity

critical (1)

✗ 2026-10-17 14:32 **[Payments]** Gateway timeouts above 5%

warning (2)

! 2026-10-17 14:18 **[Search]** Index lag above 60 seconds

! 2026-10-17 09:30 **[Auth]** Failed sign-ins rose to 1,200 per minute

ok (1)

✓ 2026-10-17 12:42 **[Backup]** Nightly backup completed in 38 minutes

info (1)

· 2026-10-17 10:05 **[Deploy]** Release 4.12 rolled out to 3 regions

Events, newest first

✗ 2026-10-17 14:32 **[Payments]** Gateway timeouts above 5%

✓ 2026-10-17 12:42 **[Backup]** Nightly backup completed in 38 minutes

· 2026-10-17 10:05 **[Deploy]** Release 4.12 rolled out to 3 regions

```
!  2026-10-17 09:30   [Auth] Failed sign-ins rose to 1,200 per minute
```

Grid layout

In this view

By default blocks stack. Give any block or table -GridSpan (1 to 12 columns) and the page becomes a 12-column grid: here three charts share a row (4 + 4 + 4) and a table spans the full width. On a phone the columns stack again.

Servers

Print

In this view

Press the Print button (or Ctrl+P). Printed output shows every section in menu order, every finding and record open, tables unpaged (up to a limit), banners and tabs flattened, and a cover page with the title, info fields and the first verdict because this report was created with -PrintCover. The menu, search, side panel and buttons do not print.

Summary 1

OVERALL

Healthy

The first verdict tile is copied onto the cover page.
